Github Repository 만들기

 Dashboard

Create your first project

Ready to start building? Create a repository for a new idea or bring over an existing repository to keep contributing to it.

[Create repository](#) [Import repository](#)

Create a new repository

Repositories contain a project's files and version history. Have a project elsewhere? [Import a repository](#).
Required fields are marked with an asterisk (*).

1

General

Owner *

Business-Data-Scientist

Repository name *

html

html is available.

Great repository names are short and memorable. How about [redesigned-potato](#)?

Description

AI Smart Work Portfolio

23 / 350 characters

2

Configuration

Choose visibility *

Choose who can see and commit to this repository

Public

Add README

READMEs can be used as longer descriptions. [About READMEs](#)

On

Add .gitignore

.gitignore tells git which files not to track. [About ignoring files](#)

No .gitignore

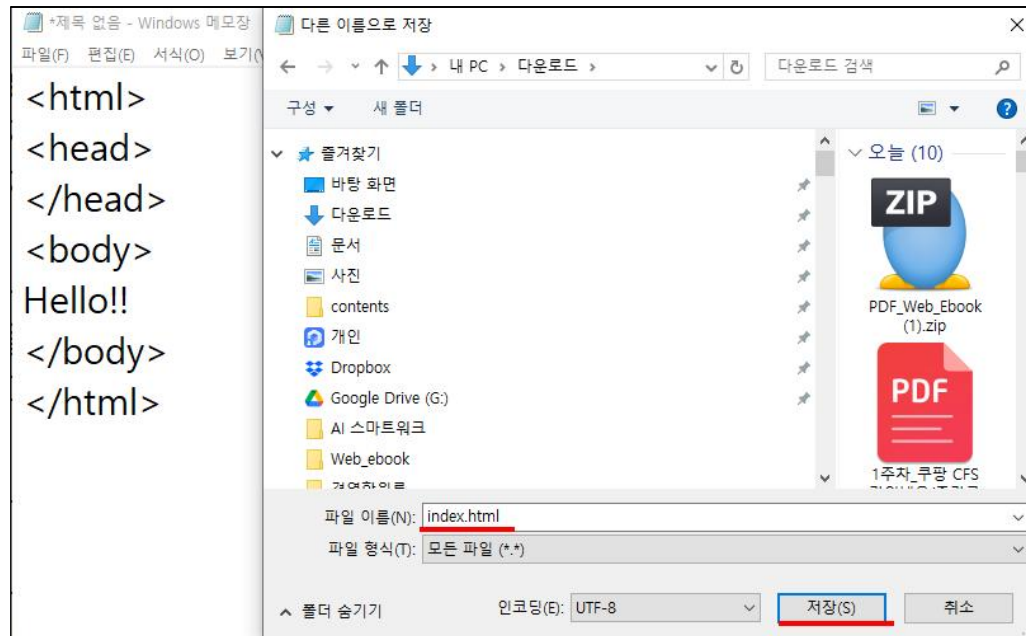

Add license

Licenses explain how others can use your code. [About licenses](#)

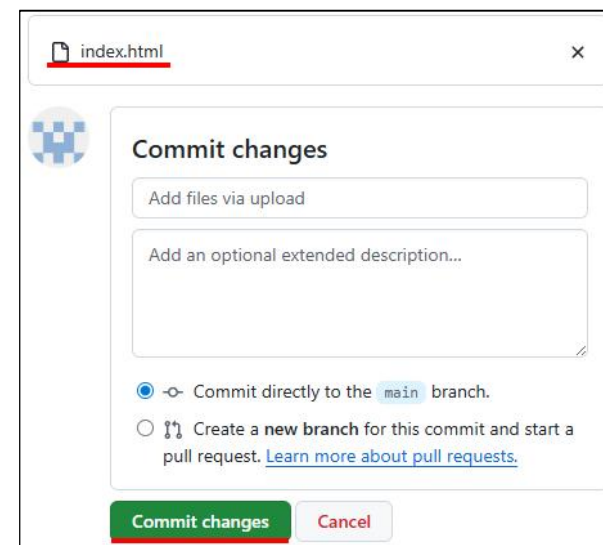

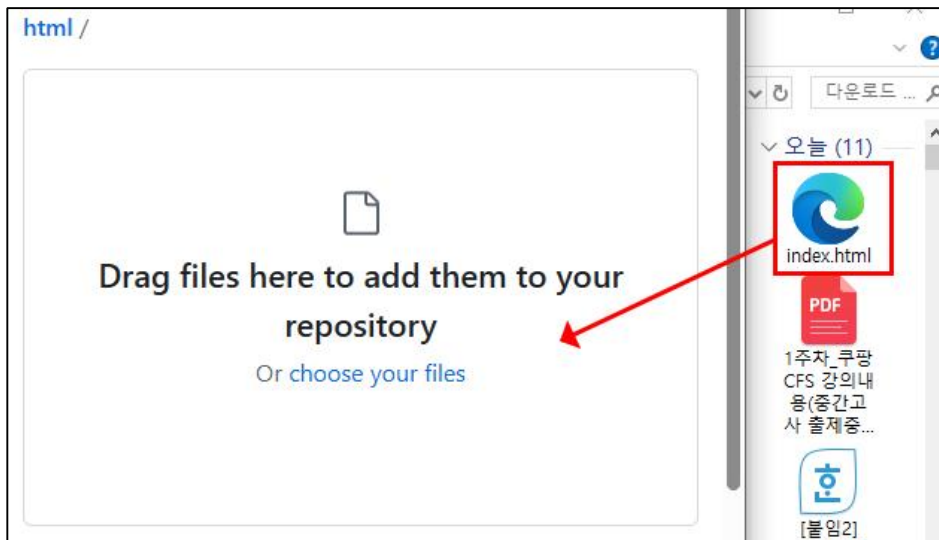

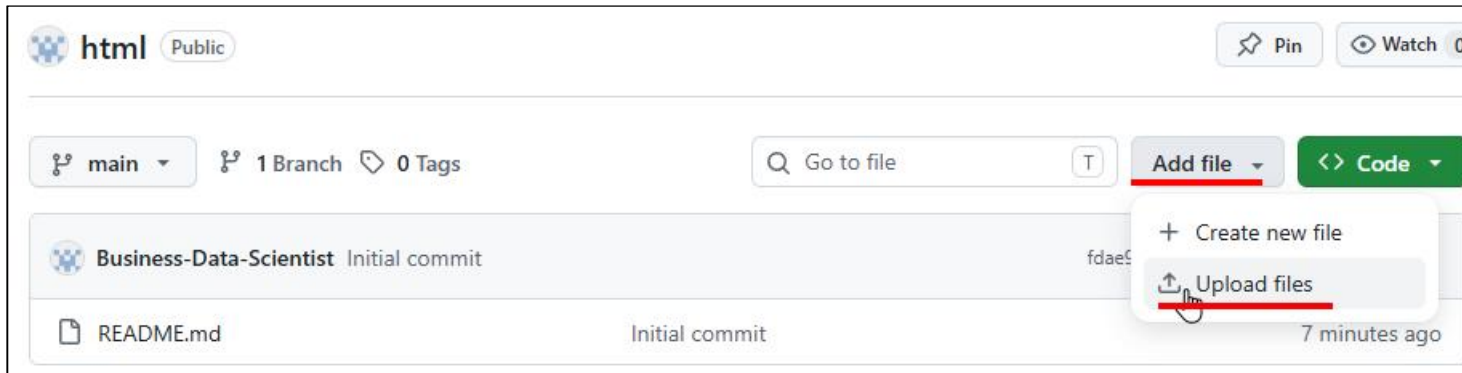

No license

Netlify Project에 Github Repository 연결하기

Install on your personal account Business-Data-Scientist 

for these repositories:

☒ **All repositories**
This applies to all current and future repositories owned by the resource owner. Also includes public repositories (read-only).

☐ **Only select repositories**
Select at least one repository. Also includes public repositories (read-only).

with these permissions:

✓ **Read** access to code and metadata

✓ **Read and write** access to checks, commit statuses, issues, and pull requests

User permissions
Netlify can also request users' permission to the following resources. These permissions will be requested and authorized on an individual-user basis.

✓ **Read** access to email addresses

Install [Cancel](#)

Next: you'll be directed to the GitHub App's site to complete setup.

Let's deploy your project.

Github Commit 하여 Netlify로 Publish 하기 (1/4)

- Commit

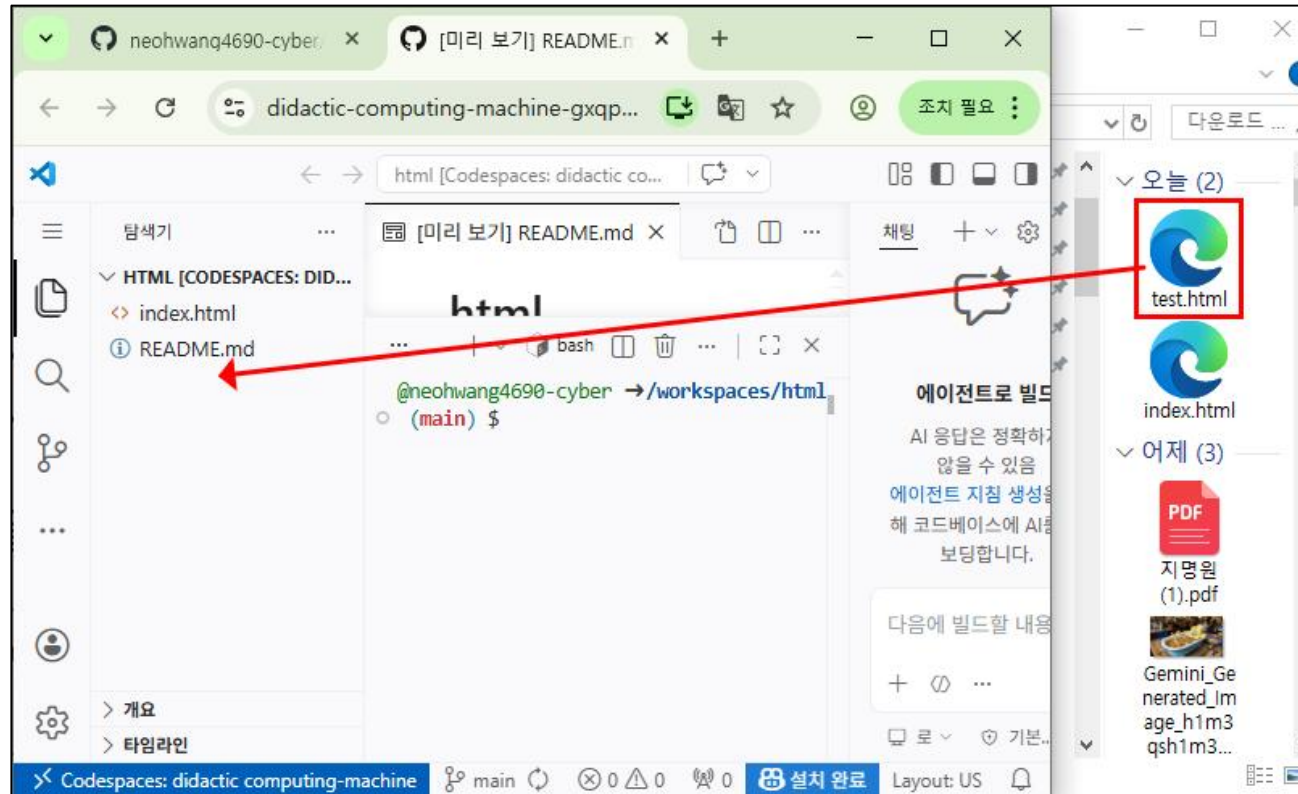

- 선택한 파일의 변경 사항을 로컬 저장소에 기록하는 행위
- 기록된 커밋은 특정 시점의 프로젝트 상태
- 커밋을 하면 Git이 해당 상태를 고유한 해시로 식별하고, 이를 통해 과거 버전으로 복원하거나 변경 이력을 추적하는 것이 가능

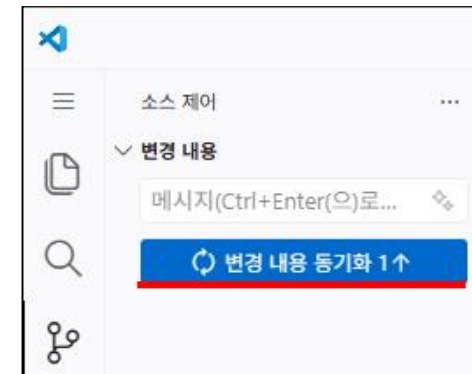

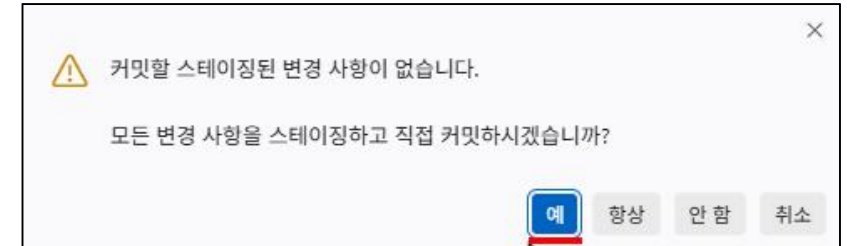

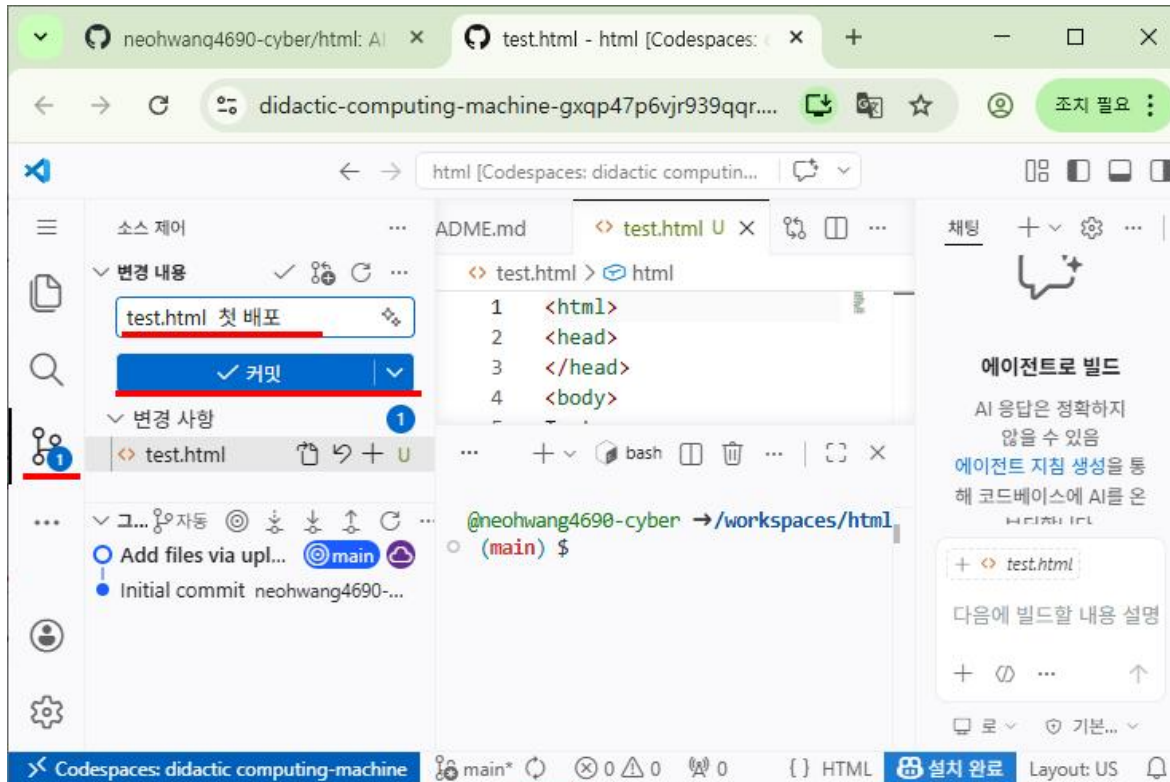

```
<html>
<head>
</head>
<body>
Test
</body>
</html>
```

Web Ebook Publish 해보기

The screenshot shows a GitHub repository interface for a user named 'Business-Data-Scientist'. The repository has a 'main' branch, 1 branch, and 0 tags. The file list includes 'README.md' (Initial commit) and 'index.html' (Add files via upload). The 'README' file is selected, showing a preview of an 'html' document titled 'AI Smart Work Portfolio'. A 'Codespaces' panel is open on the right, displaying 'No codespaces' and a button to 'Create codespace on main'. The panel also includes a link to 'Learn more about codespaces...' and a note that 'Codespace usage for this repository is paid for by Business-Data-Scientist.'
